

Are you interested in learning to fly RC Airplanes?

The Tulip City Air Force* would like to invite anyone 10 years or older and interested in flying radio controlled airplanes to come out to our flying field on Saturday May 21st from 9:00AM to 2:00PM. In the event of weather cancellation the event will be the following day, May 22nd.

In association with the Academy of Model Aeronautics** , *Take Off And Grow* -TCAF will be hosting free introductory training sessions to give you a hands on trial with one of our trainer aircraft using a buddy box system.

Several aircraft will also be there to do flight demonstrations throughout the day.

Participants may be asked to sign a release form on the day of the event. Participants under the age of 18 must have a parent or guardian present at all times. Flights will be limited to accommodate time and participation levels.

For more information contact TCAF club president, Mike Tharp at 616-403-7013.

TCAF Field is located on 146th Ave 1/8th mile East of 52nd street and the I-196 freeway. Due to construction on 146th Ave follow Waverly road to 32nd street, then go East to 52nd street and go south. Proceed to 146th Ave and go East to field which is on the North side of the street. There is a club sign by the road to identify the entrance. *Please drive slowly on the driveway and do not go off the trail.*

Come on out and experience flying radio controlled airplanes!

*The Tulip City Air Force is a Holland, Mi. group of nearly 50 members who enjoy building and flying a wide variety of model aircraft ranging from inexpensive foam constructed electrics to 1/3rd scale gas powered acrobatics. It is a rewarding hobby that provides unlimited growth and expertise. Today's vast selection of ARFs (almost ready to fly) airplanes are designed for those without a lot of building skills and yet allow them the privilege to get right to flying. Check out our website for more information on our club at www.tulipcityairforce.com

**The AMA (Academy of Model Aeronautics) is a national organization that began over 75 years ago to advance model aviation by providing safety guidelines, annual national flying events, a partnership with the FAA, liability insurance and a wonderful monthly magazine, 'Model Aviation' to its members.
